Awards and Acknowledgements

Finalist of HUAWEI Seeds For the Future program

The program consists of webinars on technology, leadership, entrepreneurship, and Chinese culture, at the end of which a Tech4Good project must be developed. **Only 50 students per country are selected** and split in teams of 5. My team and I won the first competition stage, being the only 5 Italians who gained the access to the final.

Skills Summary

The bachelor and the master that I attended give me a good knowledge of mathematics, programming, data structures and problem-solving in general.

Education

Bachelor of science at Università degli studi Roma Tre | December 2019

BCS in Computer Science Engineering

Master of science at Università La Sapienza | December 2022

The master is focused on the data science world. Main courses are about AI, Machine Learning and Big Data.

Experience

Math tutoring for a high school student

It allowed me to learn:
- how to effectively convey information
- how to stimulate someone and push him to work hard
